

Generating solutions for individuals

Boundless possibilities

A system with many combination possibilities. That's what makes System M one of the most flexible switch ranges around. Design and surface options can be exchanged and combined with each other without having to replace the insert.

The system offers not only a wide array of design, but also most flexibility. Thanks to universal flush-mounted inserts you can install any required function.

The system principle

Frontstage importance to the background

Flush-mounted inserts

High quality flush-mounted inserts are the clever basis of System M. They offer your customers flexibility with an uncomplicated method of exchanging frames and functions. The advantage for you lies in a straightforward, fast and secure installation.

A high-quality electrical installation proves its quality even in those places where it is invisible to the customer during everyday use, as in the case of the flush-mounted inserts. System M also performs well behind the scenes, with quality "engineered in Germany"; because the inserts are not only designed for long service life, they also offer you a straight-forward, fast and secure installation.

Great variety of functions

System M offers flexibility and great variety of functions: Socket-outlets, switches and push-buttons, inserts for blind and temperature control, TV or audio and data technology, movement and presence detectors,

thermostats, dimmers and time switches, controls for RF and KNX – System M meets all requirements and operates well in all technologies.

QuickFlex® – It's easy to get more done

Flush-mounted inserts for quick installation

Schneider Electric's new QuickFlex® base system is the perfect stepping stone to success. The five factors of success of the QuickFlex® inserts for switches and socket-outlets show you how you can complete installations up to 25% faster and simply accomplish more every day.

The five factors of success

The three steps for fast installation – connect, align, fasten – plus easy testing and intelligent additional functions – these are the five factors of success of QuickFlex®. See in detail how much easier QuickFlex® can make your installation workflow.

Connection - Connecting made easy

Fixing frame - Align quickly and safely

Fastening – Fasten in seconds

Test contacts - Convenient testing from the front

Modules - Intelligent additional functions

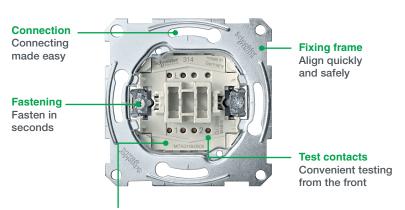

QuickFlex® – Switch and socket-outlet inserts

Advantages at a glance

QuickFlex® Switch

Intelligent additional functions can be retrofitted without the need for disassembly work

From audio to time switch

System M – a host of functions

Requirements to electrical installations are very different. No matter how secure and energy-efficient the installation should be – System M offers the right solution.

Office solutions

Residential solutions

One complete system with solutions for every demand.

The range includes traditional user interfaces such as rockers or socket-outlets, multifunction push-buttons, roller shutter switches and blind push-buttons, all the way through to inserts for connecting telephones, computers or communications technology.

The technology doesn't matter

System M - unites all technologies

System M is open to anything. There are no technological hurdles. As a result, you are free to think in terms of solutions and offer your customers everything from classic electrical installations, to radio system solutions and complete KNX.

System M + simple functions = comfort

Many customers opt for a classic installation. System M realises these requirements reliably and offers many innovative functions in a design consistent with your customer's personal style.

System M + KNX = efficiency

KNX combines all kinds of building functions in one intelligent system. That means improved comfort, security and efficiency. System M covers all functions and provides you with an intelligent framework. And on top KNX provides the needed conditions to maximise energy savings.

System M + radio system Connect = flexibility

With radio system Connect, you give your customers the opportunity to implement new functions without major assembly work. And

because, thanks to System M, everything is available in individually customised designs, the radio solution fits seamlessly into place.

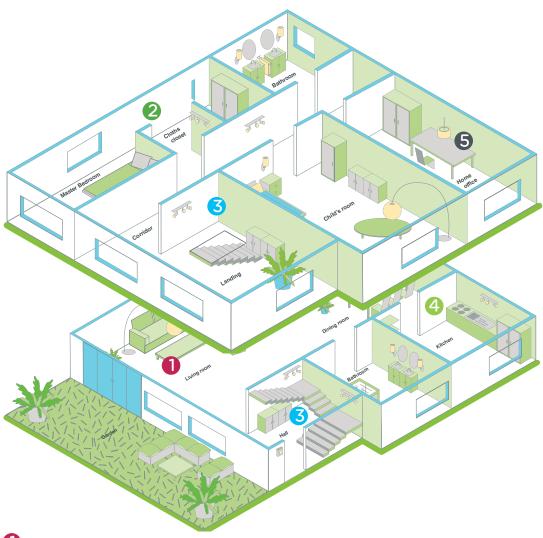

Complex requirements

Linked with System M

System M allows you to think in terms of solutions that link all technologies.

Tailor-made solutions

System M is intelligent diversity. It is simple, flexible, technically sophisticated and perfectly designed. It provides the ideal solution for every living situation.

1 Living room

TV, video, music and internet are essential for the living room. All these functions are available in System M and can be connected in series to the multi-gang frame. And when the living room is transformed into a home theater, a dimmer brings the pleasant lighting.

Socket-outlet, loudspeaker connector and socket-outlet for

Rotary dimmer

You have a brand new beedroom furniture, and it would be nice to control lighting from the bed? With System M and RF System Connect simply screw or stick a radio push-button to the wall beside your new bed - finished. Without mounting new cables or prying open walls.

Radio push-button

By identifying socket-outlets for special applications, Schneider Electric has combined the subjects of safety and convenience with added-value. Especially in the kitchen, where special circuits are often intended for individual consumers such as freezer or dishwasher, the socket-outlets with labelling provide more safety and comfort.

Socket-outlet marked freezer

Socket-outlet marked dishwascher

Corridor

A really brilliant idea: fitting socket-outlets with the latest LED technology and expanding the function of the socket beyond simply providing electricity. This gives you added value that you can literally see. Thanks to the integrated LED, the light-emitting socket-outlets can be used as very practical markers in the dark. Movement detectors offer extra comfort and security, in terms of energy consuption, too. They offer an intelligent option to save energy.

Socket-outlet with floorlight

Movement detector, 2.20 m

All the important functions on site, including telephone, internet and socket-outlets. With the multi-gang frames, all functions can be neatly installed in lines where they are needed.

Socket-outlet with surge protection, telephone and RJ45 insert

The personal touch

System M complements individual living styles

From thermoplastic, to glass and metal, to wood – five different designs offer numerous materials, surfaces and colours, from which you can create your own individual style.

M-Elegance

M-Elegance

High quality and elegant

A product's material, as well as its form and colour, make it unique and very special. Due to their high value and palpably genuine materials, M-Elegance frames from Schneider Electric are highly appealing. Wether glass, wood or metal, M-Elegance frames have something for every taste. M-Elegance also makes a good impression through its balanced frame: insert ratio.

M-Elegance Metal

Its surface, restrained colours and high-quality, genuine material distinguish M-Elegance Metal. Whether in restrained platinum silver, robust rhodium grey, high gloss finished chrome or exclusive titanium.

M-Elegance, Metal, titanium/polar white

M-Elegance, Metal, chrome/polar white

M-Elegance, Metal, platinum silver/anthracite

M-Elegance, Metal, rhodium grey/polar white

M-Elegance Real glass

A high-quality, distinctive material – glass comes into its own in the M-Elegance frame version. The outer edges are cut like precious stone to emphasize the glass' elegant look and feel.

M-Elegance, Real glass, brilliant white/polar white

M-Elegance, Real glass, onyx black/polar white

M-Elegance, Real glass, mahogany brown/polar white

M-Elegance Solid wood

Extra warm and cosy – M-Elegance Solid wood frames from Schneider Electric create atmosphere. With a distinctive wood grain and a natural look and feel, perfect for people who desire a rich, harmonious living atmosphere.

M-Elegance, Solid wood, beech/polar white

M-Elegance, Solid wood, cherry/polar white

M-Elegance, Solid wood, walnut/polar white

M-Elegance, Solid wood, wenge/polar white

M-Pure

The principle of clean lines

When developing M-Pure, Schneider Electric focussed on purity of form. The result: a new System M frame design which perfectly embodies the principle of clean lines. A complementary variant, M-Pure Decor, incorporates high-quality materials to naturally accent any environment.

M-Pure

Imagine simple, functional forms that suits on any wall. Geometric in shape, with an unexpected air of delicacy. The new M-Pure frame design is available in four colour variants: active white and polar white in brilliant thermoplastic, as well as aluminium and anthracite in elegant matt thermoplastic.

M-Pure, active white

M-Pure, polar white

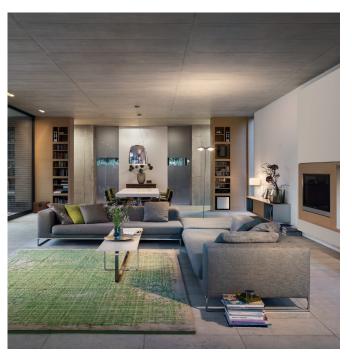

M-Pure, aluminium

M-Pure, anthracite

M-Pure Decor

The symbiosis of shape, colour and material

M-Pure Decor embeds a 1 mm thick layer of high-quality material in an elegant frame, creating a perfect natural accent for any wall. Each material – stainless steel, slate, wenge, or oak – has its own unique personality, but all offer a sumptuous visual and tactile experience.

Frames

The inserts for the M-Creativ range can be found under "System M/Inserts".

In M-Creativ, the transparent cover, set of foils and supporting frame form one unit. The set of foils consists of foils in the colours white, black, red and beige. Instead of foils, it is also possible to insert strips of wallpaper or other papers/foils (max. 0.6 mm) between the supporting frame and the transparent cover. A foil from the set of foils can be used as a cutting template for this. Nothing stands in the way of your customers' creativity.

Dimmable, electronic transformers

Universal LED dimmer module

Art. no.

black

CCT99100

For ohmic, inductive or capacitive loads, e.g. dimmable LED lamps, incandescent lamps, dimmable wound transformers or electronic transformers.

Leading or trailing edge

The universal dimmer automatically recognises the connected load. Do not connect any mixed loads.

The dimmer module is controlled with mechanical push-buttons in parallel operation.

By Installing the dimmer module in combination with a push-button is a deep (60th) installation box to be used.

With screw terminals. Type-Number: T53000

Nominal voltage: AC 230 V, 50 Hz Switching capacity:

LED lamps: 4-100 VA (RC mode) 4-20 VA (RL-LED mode) Incandescent lamps: 5-200 W Halogen lamps: 5-150 W (230 V)

5-200 VA (LV with dimmable wound transformer) 5-200 VA (LV with dimmable electronic transformer)

Neutral conductor: not required

Connecting terminals: Screw terminals for max. 2.5 mm²

Protection: 16 A circuit breaker **Dimensions:** 44.5 x 39.5 x 20 (HxWxD)

Properties:

- Short-circuit-proof
- Overload-proof
- Resistant to overheating
- Soft start
- memory function
- Automatic load detection
- Min. / max. limit can be set
- RL-LED operating mode can be set

Note: Information about the "Dimming LED lamps" can be obtained on the Internet at

"Schneider-Electric dimmer test". http://schneider-electric.dimmer-test.com

Programmable universal temperature control unit insert with touch display

Version	Art. no.

MTN5776-0000

The room or floor temperature can be controlled using the programmable universal temperature control unit insert with touch display. It is operated via a touch display.

Electrical underfloor heating, radiators or valve drives can be connected to the control unit. The thermostat has a weekly clock with individually adjustable programs. Alternatively, you can choose between 3 pre-programmed weekly programs.

Different heating modes are available: comfort mode, eco mode and frost protection mode.

The thermostat can be operated in four different operating modes:

Room temperature mode

The internal temperature sensor detects and controls the room temperature.

Floor mode

The floor sensor, which is available as an accessory, detects the floor temperature and controls the electrical under floor heating.

Dual mode

The internal temperature sensor detects and controls the room temperature. At the same time, the floor sensor monitors the floor temperature and limits it to the predefined maximum temperature value. This operating mode is particularly recommended for temperature-sensitive parquet and laminate floors.

PWM mode

The pulse width modulator (PWM) switches the heating on and off at regular intervals. The preferred temperature is set via the PWM value. The floor sensor has no function in this operating mode. The room temperature limits are complied with.

Functions:

- Automatic changeover between summer and winter time
- Valve protection function
- Operating hours display
- Control unit behaviour: PWM or 2-level
- Relay output behaviour: Break/make contact
- Self-learning lead times Type-Number: WTH-16

Nominal voltage: 230 V AC, 50 Hz
Nominal load (ohmic): 3680 W, 16 A
Nominal load (inductive): 1 A, cos φ = 0.6
Operating temperature: -10 °C to +35 °C

Adjustment range

Room temperature: +5 °C to +35 °C Floor temperature: +5 °C to +50 °C

Accessories: Wind sensor interface MTN580693

Note: In combination with the standard blind time switch, the extension input does not work.

Blind control system, time switches

For System M.

For programmed and time-dependent switching of blind/roller shutter motors.

Functions:

- 4 push-button operation
- Pre-set switching times
 Time block Mon-Fri: 1xup, 1xdown time can be programmed
- Time block Sat-Sun: 1xup, 1xdown time can be programmed
- Quick programming function
- Programming possible without flush-mounted insert
- Reserve power up to 6 hours (without battery)
- Reset to restore factory settings
- Manual operation possible at any time

Reversing time on change in direction: min. 1 second

Accuracy: ±1 min. per month

To be completed with: Standard blind control insert MTN580698, Blind control insert with extension input MTN580699

Note: In combination with the blind control insert with extension input, the extension input does not work.

Push-buttons System M

For System M.

Push-button with 1 to 4 operating buttons and status displays. In idle state, the surface of the push-button appears as a uniform plane. The inscription of the keys only becomes visible via the backlit symbols following activation. For this, you can use the enclosed prefabricated foils or the individual symbols with various motifs.

The position of the operating buttons varies depending on the selected number of operating buttons.

ETS device functions:

- Behaviour and brightness of the status displays
- Night mode: LEDs light up with reduced brightness
- Proximity function: The LEDs are only activated and the functions only become visible when approached.

With integrated bus coupler. The bus is connected using a bus connecting terminal.

KNX software functions:

2 programming options:

- Express setting: Calls up a pre-set configuration
- Advanced setting: Individual configuration

Switching, toggling, dimming (single/dual-surface), blind (single/dual-surface), pulse edges trigger 1-, 2-, 4- or 8-bit telegrams (distinction between short and long operation), pulse edges with 2-byte telegrams (distinction between short and long operation), 8-bit linear regulator, scene retrieval, scene saving, disable functions.

Accessories: Dismantling protection MTN6270-0000 Foil set for KNX Push-button Pro MTN6270-0010 Note: Programmable with ETS4 and higher. Contents: Device with inserted prefabricated foil. With bus connecting terminal and supporting plate.

New

For System M.

Comfortable room controller for controlling up to 32 room functions and the room temperature. All functions are displayed on a touch screen and are called up using simple finger movements. The user chooses from 3 interface designs that can be freely assigned to the room functions. The room temperature control can be shown in 2 different designs.

With room temperature control unit, display and connection for the remote sensor. The room temperature control unit can be used for heating and cooling with infinitely adjustable KNX valve drives or to trigger switch actuators and heating actuators.

ETS device functions:

- Switch-on behaviour of the user interface
- Proximity function: The display and the start screen only become visible when approached
- Gesture function: The device recognises a gesture (horizontal or vertical swipe movement) and triggers a function. In this way, the light can be switched on when you enter the room, for example.
- Cleaning mode: For a specific period of time, neither touches nor gestures are detected
- Adjusting the background lighting
- Setting the screen saver

With integrated bus coupler. The bus is connected using a bus connecting terminal.

KNX software functions:

Control unit/push-button:

Switching, toggling, dimming (single/dual-surface), blind (single/dual-surface), pulse edges trigger 1-, 2-, 4- or 8-bit telegrams, pulse edges with 2-byte telegrams, 8-bit linear regulator, scene retrieval, scene saving, signal function, fan control, operating modes, setpoint adjustment

Functions of the room temperature control unit:

Controller type: 2-step controller, continuous-action PI control, switching PI control (PWM) Output: continuous in the range 0 to 100% or switching ON/OFF Controller mode:

- Heating with one controller output
- Cooling with one controller output
- Heating and cooling with separate controller outputs
- 2-step heating with 2 control outputs
- 2-step cooling with 2 control outputs
- 2-step heating and cooling with 4 control outputs

Operating modes: Comfort, comfort extension, standby (ECO), night reduction, frost/heat protection

Move all setpoints. Save all setpoint temperatures and operating modes when reset. External temperature monitoring. Additional output of the control value as 1 byte value on the PWM.

Signal function for the actual temperature, valve protection function.

Scene function.

Operation: Touch display

Accessories: Dismantling protection MTN6270-0000

Remote sensor for room temperature control unit UP/PI MTN616790

Note: Programmable with ETS4 and higher.

Contents: With bus connecting terminal and supporting plate.

For System M

Convenient control unit with 4 operating buttons, operating and status display and labelling field. The operating display can also be used as an orientation light.

With room temperature control unit and display.

With 5 red LEDs.

The room temperature control unit can be used for heating and cooling with infinitely adjustable KNX valve drives or to trigger switch actuators and heating actuators. With the white backlit display for showing e.g. the time, date, temperature and operating mode. Menu for setting default operating modes, setpoint value, working/non-working day (external trigger), display mode, time, switching times and brightness of the display.

The push-buttons are freely parameterisable as push-button pairs (dual-surface) or as single push-buttons.

. With integrated bus coupler. The bus is connected using a bus connecting terminal.

KNX software functions:

Functions of the push-buttons:

Switching, toggling, dimming, blind control (relative or absolute), pulse edges trigger 1-, 2-, 4- or 8-bit telegrams (distinction between short and long operation), pulse edges with 2-byte telegrams (distinction between short and long operation), 8-bit linear regulator, scene retrieval, scene saving, disable functions, timed control with synchronisation, notification functions, the cyclic reading of external temperature values, fan control, operating modes, move setpoints. Functions of the room temperature control unit:

Controller type: 2-step control, continuous PI controller, switching PI controller (PWM)

Output: continuous in the range 0 to 100% or switching ON/OFF

Controller mode:

- Heating with one controller output
- Cooling with one controller output
- Heating and cooling with separate controller outputs
- Heating and cooling with one controller output
- 2-step heating with 2 control outputs
- 2-step cooling with 2 control outputs
- 2-step heating and cooling with 4 control outputs

Operating modes: Comfort, comfort extension, standby, night reduction, frost/heat protection Move all setpoints, save all setpoint temperatures and operating modes when reset, external temperature monitoring, additional output of the control value as 1 byte value on the PWM. Monitoring function for the actual temperature, valve protection function.

Scene function.

Operation: Menu.

Contents: With bus connecting terminal and supporting plate.

Screw for protection against dismantling.

With protective hood for plaster.

For System M.

Movement detector for indoors.

When a movement is detected, a data telegram defined by the programming is transmitted.

With integrated bus coupling unit.

KNX software functions: Five movement blocks: up to four functions can be triggered per block. Telegrams: 1 bit, 1 byte, 2 bytes.

Normal operation, master, slave, safety pause, disable function. Sensitivity, brightness and staircase timer can be set using the ETS or the potentiometer. Self-adjusting staircase timer.

Angle of detection: 180° Range: 8 m (for mounting height of 1.1 m)

Number of levels: 1 Number of zones: 14

Sensitivity: infinitely adjustable (ETS or potentiometer)

Light sensor: infinitely adjustable from approx. 10 to 2000 Lux (ETS or potentiometer) Time: adjustable in steps from 1 s to 8 min (potentiometer) or adjustable from 1 s to 255 hours

EC Directives: Low-voltage guideline 2006/95/EC and EMC guideline 2004/108/EC Contents: With bus connecting terminal and supporting plate.

KNX ARGUS 180/2.20 m flush-mounted

	polar white, glossy	MTN631719
	active white, glossy	MTN631725
	anthracite	MTN632714
	aluminium	MTN632760

For System M.

Indoor movement detector with anti-crawl protection.

When a movement is detected, a data telegram defined by the programming is transmitted. With integrated bus coupling unit. For wall mounting in a size 60 mounting box, optimal installation at 2.2 m.

KNX software functions: Five movement blocks: up to four functions can be triggered per block. Telegrams: 1 bit, 1 byte, 2 bytes.

Normal operation, master, slave, safety pause, disable function. Sensitivity, brightness and

staircase timer can be set using the ETS or the potentiometer. Two movement sensors: the sensitivity and range can be set separately for each sensor. Self-adjusting staircase timer. Angle of detection: 180°

Range: 8 m right/left, 12 m to the front (for a mounting height of 2.20 m)

Mounting height: 2.2 m or 1.1 m with half the range

Number of levels: 6 Number of zones: 46

Number of movement sensors: 2, sector-orientated, adjustable Sensitivity: infinitely adjustable (ETS or potentiometer)

Light sensor: infinitely adjustable from approx. 10 to 2000 Lux (ETS or potentiometer) Time: adjustable in steps from 1 s to 8 min (potentiometer) or adjustable from 1 s to 255 hours

EC Directives: Low-voltage guideline 2006/95/EC and EMC guideline 2004/108/EC Contents: With bus connecting terminal and supporting plate.

With cover segments to limit the area of detection.

KNX ARGUS Presence 180/2.20 m flush-mounted

Version		Art. no.
	white, glossy	MTN630444
	polar white, glossy	MTN630419
	active white, glossy	MTN630425
	anthracite	MTN630614
	aluminium	MTN630660

For System M.

Presence detection indoors.

If KNX ARGUS Presence detects smaller movements in the room, data telegrams are transmitted via KNX to control the lighting, blind or heating at the same time.

When the lighting is controlled by brightness-dependent movement detection, the device constantly monitors the brightness in the room. If sufficient natural light is at hand, the device switches the artificial light off even if a person is present. The overshoot time can be adjusted using the ETS.

With integrated bus coupling unit. For wall mounting in a size 60 mounting box, optimal installation at 2.2 m. With anti-crawl protection.

KNX software functions: Five movement/presence blocks: up to four functions can be triggered per block. Telegrams: 1 bit, 1 byte, 2 bytes.

Normal operation, master, slave, monitoring, safety pause, disable function. Two movement sensors: the sensitivity and range can be set separately for each sensor. Self-adjusting staircase timer. Actual brightness value: can be detected via the internal and/or an external light sensor. Actual value correction.

Angle of detection: 180°

Range: 8 m right/left, 12 m to the front (for a mounting height of 2.20 m)

Mounting height: 2.2 m or 1.1 m at half the range

Time: adjustable in steps from 1 s to 8 min (potentiometer) or adjustable from 1 s to 255 hours

(ETS)

Number of levels: 6 Number of zones: 46

Number of movement sensors: 2, separately adjustable

Light sensor: internal light sensor infinitely adjustable from approx. 10 to 2000 Lux (ETS); external light sensor via KNX

EC Directives: Low-voltage guideline 2006/95/EC and EMC guideline 2004/108/EC

Contents: With bus connecting terminal and supporting plate.

With cover segments to limit the area of detection.

KNX Room temperature control unit, flush-mounted/PI with 4-gang push-button interface

Version		Art. no.
	white, glossy	MTN616744
	polar white, glossy	MTN616719
	active white, glossy	MTN616725
	anthracite	MTN616814
	aluminium	MTN616860

For System M.

The device is a room temperature control unit and a binary input. Depending on the operating mode, the current temperature setpoint value and the room temperature, a control value for the heating or cooling control unit is transmitted to the KNX. The temperature can either be recorded by the internal or the external temperature sensor which must be connected to the push-button interface.

The push-button interface generates an internal signal voltage for connecting max. four conventional push-buttons or floating contacts. Of these, two inputs can be used to connect low current LEDs.

With integrated bus coupler. The bus is connected using a bus connecting terminal.

KNX software functions:

Functions of the room temperature control unit:

Controller type: 2-step control, continuous PI control, switching PI control (PWM)

Output: continuous in the range 0 to 100% or switching ON/OFF

Controller mode:

- Heating with one controller output
- Cooling with one controller output
- Heating and cooling with separate controller outputs
- Heating and cooling with one controller output
- 2-step heating with 2 control outputs
- 2-step cooling with 2 control outputs

Operating modes: comfort, comfort extension, standby, night economy, frost/heat protection

Operation: Setpoint adjustment can be parameterised in the range with adjusting wheel; presence push-button functions can be parameterised/switched off

Valve protection, controller disable

Push-button interface functions:

Switching, dimming, external blinds, valuator (dimming valuator, extension unit for light scenes with/without memory function, temperature valuator, brightness valuator).

Push-button interface: up to 4 inputs, 2 of which can be used as outputs and one for con-

necting the remote sensor. **Output voltage:** 5 V (SELV) **Output current:** max. 0.8 mA

Max. cable length: Inputs/outputs max. 5 m, remote sensor max. 50 m

Accessories: Remote sensor for room temperature control unit UP/PI MTN616790

Room temperature control unit with display

Version		Art. no.
	white, glossy	MTN6241-0344
	polar white, glossy	MTN6241-0319
	active white, glossy	MTN6241-0325

	aluminium	MTN6241-0460

KNX Room temperature control unit with display, labelling field, operation and status LED. The 4 buttons allow to shift set values and change operation modes.

With 5 red LEDs. The room temperature control unit can be used for heating and cooling with infinitely adjustable KNX valve drives or to trigger switch actuators and heating actuators. With the white backlit display for showing e.g. the time, date, temperature and operating mode. Menu for setting default operating modes, setpoint value, working/non-working day (external trigger),

display mode, time, switching times and brightness of the display. With integrated bus coupler. The bus is connected using a bus connecting terminal.

KNX software functions:

Functions of the room temperature control unit:

Controller type: 2-step control, continuous PI controller, switching PI controller (PWM)

Output: continuous in the range 0 to 100% or switching ON/OFF

Controller mode:

- Heating with one controller output
- Cooling with one controller output
- Heating and cooling with separate controller outputs
- Heating and cooling with one controller output
 2-step heating with 2 control outputs
- 2-step cooling with 2 control outputs
- 2-step heating and cooling with 4 control outputs

Operating modes: Comfort, comfort extension, standby, night reduction, frost/heat protection

Move all setpoints, save all setpoint temperatures and operating modes when reset, external temperature monitoring, additional output of the control value as 1 byte value on the PWM.

Monitoring function for the actual temperature, valve protection function.

Functions of the push-buttons:

Selection of 1-4 operating modes each push-button. Move setpoint. Accessories: Protective hood for plaster System M MTN627591 Contents: With bus connecting terminal and supporting plate. Screw for protection against dismantling. With protective hood for plaster.

Room temperature control unit for properties

Version		Art. no.
	white, glossy	MTN6221-0344
	polar white, glossy	MTN6221-0319
	active white, glossy	MTN6221-0325
	anthracite	MTN6221-0414
	aluminium	MTN6221-0460

For System M.

KNX room temperature control unit for properties with integrated bus coupler. Depending on the operating mode, the current temperature setpoint value and the actual room temperature, a control value for the heating or cooling control unit is transmitted to the KNX. The temperature can optionally be measured by the internal or by an external bus temperature sensor. The room temperature control unit can be used for heating and cooling with infinitely adjustable KNX valve drives or to trigger switch actuators and heating actuators. Operating mode, nominal value, control function settings made only via the bus. The device does not have any operating and display elements.

With integrated bus coupler. The bus is connected using a bus connecting terminal.

KNX software functions:

Functions of the room temperature control unit:

Controller type: 2-step control, continuous PI controller, switching PI controller (PWM)

Output: continuous in the range 0 to 100% or switching ON/OFF

Controller mode:

- Heating with one controller output
- Cooling with one controller output
- Heating and cooling with separate controller outputs
- Heating and cooling with one controller output
 2-step heating with 2 control outputs
- 2-step cooling with 2 control outputs
- 2-step heating and cooling with 4 control outputs

Operating modes: Comfort, comfort extension, standby, night reduction, frost/heat protection

Move all setpoints, save all setpoint temperatures and operating modes when reset, external temperature monitoring, additional output of the control value as 1 byte value on the PWM.

Monitoring function for the actual temperature, valve protection function.

Operation: only via bus telegrams.

Contents: With bus connecting terminal and supporting plate.

With protective hood for plaster.

Key and rotary switches

Surge protection module

Version

Art. no.

MTN2005-0004

Extension/spare part module for QuickFlex socket-outlets.

The integrated surge protection module protects devices connected at the socket-outlet from voltage peaks in the network. The module also protects socket-outlets located within a radius of five metres on the same electrical circuit.

With visual and audible fault display: Following a current surge, the green control LED will go out and, if a plug is inserted, a signal tone will sound.

A central plate with a lens is required for the visual display.

For retrofitting of socket-outlets with Quick-Flex base.

Warm white LEDs illuminate an area under the socket-outlet. The illuminated area can be optimally adjusted by altering the light emission.

When it is dark, the LED lights are switched on automatically and are switched off again when there is sufficient ambient light. The brightness threshold can be conveniently set from the front without any dismantling work on the central plate. Automatic mode can also be switched off on the central plate so that the lights remain switched off e.g. when going on holiday.

Extension module for all QuickFlex socketoutlets. Central plate with lens for control lamp. The green LED lights up when a network voltage is present.

Replacement part: LED indicator lamp module MTN2003-0004

16 A, AC 250 V, DIN 49440

Features:

- Frontal retrofitting of QuickFlex additional modules with no disassembling of the socket-outlet.
- Quick-fastening screws for securing of claws.
- Flush-mounted claws with return springs.
- High-gloss galvanised fixing frame insulated to the claw.

With screwless terminals.

With claw and screw fixing

16 A, AC 250 V, DIN 49440

Features:

- Frontal retrofitting of QuickFlex additional modules with no disassembling of the socket-outlet.
- Quick-fastening screws for securing of claws.
- Flush-mounted claws with return springs.
- High-gloss galvanised fixing frame insulated to the claw.

With screw/lift terminals for fixed and flexible conductors up to 4 mm²

With claw and screw fixing.

Surge protection module

Art. no.

MTN2005-0004

Extension/spare part module for QuickFlex socket-outlets.

The integrated surge protection module protects devices connected at the socket-outlet from voltage peaks in the network. The module also protects socket-outlets located within a radius of five metres on the same electrical circuit.

With visual and audible fault display: Following a current surge, the green control LED will go out and, if a plug is inserted, a signal tone will sound.

A central plate with a lens is required for the visual display.

Spare part of: SCHUKO socket-outlet with surge protection and labelling field System M MTN2405-03../-04.., Artec/Antique MTN2405-40../-41.., Central plate with labelling field and surge protection module for SCHUKO socket-outlet System M MTN2335-03../-04.., Central plate with labelling field and surge protection module for socket-outlet with pin earth System M MTN2535-03.. /-04..

LED indicator lamp module

Version Art. no.

With green LED MTN2003-0004

Extension/spare part module for QuickFlex socket-outlets. The green LED lights up when a network voltage is present.

QuickFlex central plate with control lamp required.
